

# **KR OPEN-SOURCE EXPO'23**

**TEAM - QUANTUM**

**PROJECT NAME - CodeCollab**

**Team members -**

**Yogesh Dhaka , Harsh Raj , Harsh Arya  
And Ayush Gupta**

## **BASIC PROJECT LOGIC (TOPIC) -**

**“CodeCollab” is an innovative online platform designed to bridge the gap between visionaries with creative ideas and individuals or teams capable of bringing those ideas to life. This website serves as a dynamic hub for collaboration, fostering connections between dreamers and doers in a variety of fields, from technology and entrepreneurship to the arts and social change.**

**People need a platform that provides them an idea and a community that can work together with excellent communication since they can not find suitable places to practice, they do not have ideas for projects, and they can't develop major projects all by themselves.**

**This is designed to assist students in discovering new projects and ideas, as well as to enable those who have solid ideas but lack the necessary coding skills to solicit contributions.**

- **It is a user friendly site.**
- **Specially designed for beginner**
- **You can also use our platform if you only have an idea and want to work on it an bring it life.**

## 04 Business/Revenue model:

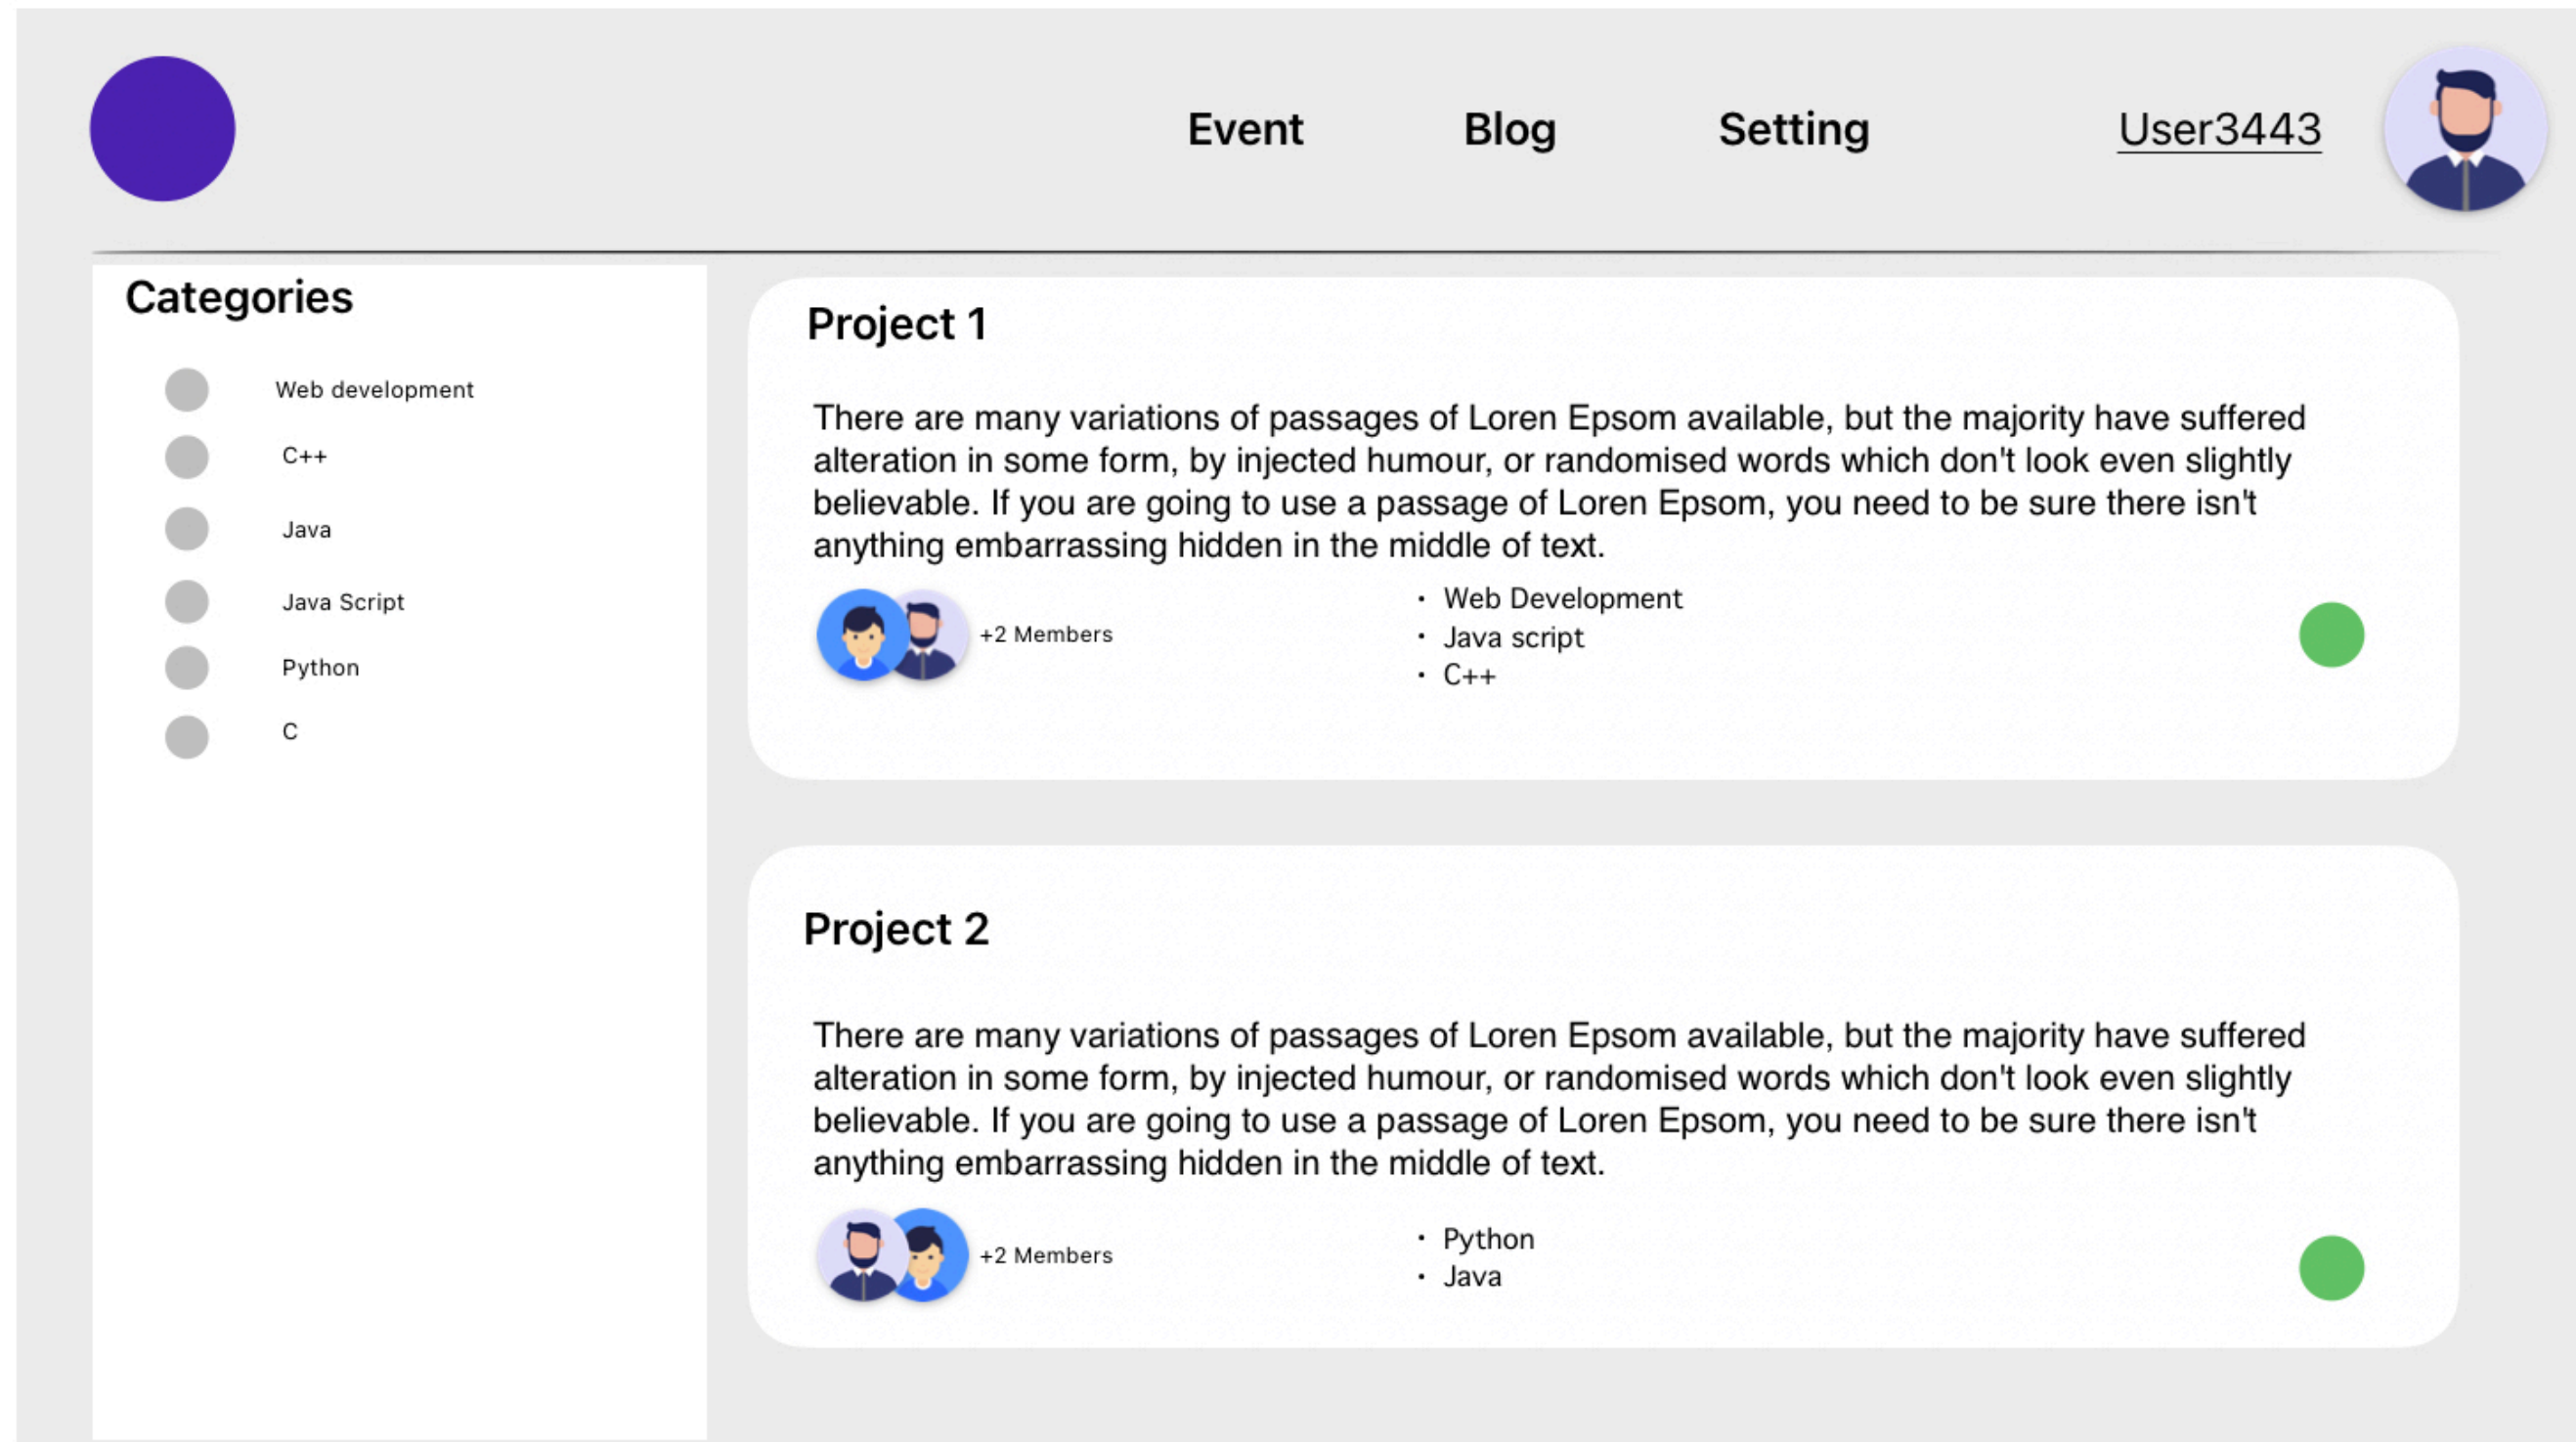

- **Subscription for assistance - You can purchase a subscription for a project if you need an assistance from the senior developers with your project; a team will help you from our end.**

Languages in use :  
Html , css , my sql

**CollabHub provides a repository of resources and guides on project development, legal considerations, funding options, and more, to support users in taking their ideas to the next level.**

## 07 A sample of the design of the site:

**Thank You**
